

IS-237 Epoxy Reducer

TECHNICAL DATA SHEET

Product Description

IS-237 epoxy reducer, qualified to MIL-T-81772 Type II, can be used to improve spray characteristics and film appearance of epoxy coatings. IS-237 is compatible with MIL-PRF-22750 high solids epoxy coatings and MIL-PRF-23377 high solids epoxy primer.

Specifications

IS-237 is qualified to:

- MIL-T-81772 Type II

Note: PPG Aerospace recommends you check the most recent specification QPLs for updated information.

Product Compatibility:

IS-237 is compatible with the following specifications:

- MIL-PRF-22750
- MIL-PRF-23377

Instructions for Use

Mixing Instructions:

Add sufficient amount of IS-237 to the admixed material to achieve the desired viscosity only after the initial viscosity of the admixed material has been determined. The amount to be added is limited by local VOC regulations and is not to exceed one pint per mixed gallon. Each fluid ounce of IS-237 adds approximately 25 grams (0.06pounds) of VOC. The addition of IS-237 will reduce volume solids of the mixed paint. Due to this reduction, achievement of the specified dry film thickness may require thicker wet films or multiple applications. End users must confirm proper dry film thickness is achieved by physical measurement.

Addition of IS-237 may extend the pot life of the mixed material by a dilution effect. Do not add IS-237 to the admixed material that is approaching the end of its pot life.

Note: It is important to condition the paint for 24 hours prior to mixing by placing all materials in the shop or hangar, with ambient temperatures between 13° to 35°C (55° to 95°F). The minimum temperature of the paint components should be 13°C (55°F) prior to mixing.

IS-237 Epoxy Reducer

Induction Time:

Not Required

Viscosity: (23°C/73°F)

Not Required

Pot Life:

Not Required

Physical Properties (product)

Color:

Clear

VOC (EPA method 24):

IS-237

837 grams/liter

Physical Constants:

Weight/gallon

6.98 pounds/gallon

Vapor Pressure

41.8 mmHg at 20°C (68°F)

Flash Point closed cup:

IS-237

0°C (32°F)

IS-237 Epoxy Reducer

Shelf Life:

24 months from date of manufacture for PRC-DeSoto Standard

Note: Shelf life is provided for original, unopened containers

Note: *The application and performance property values above are typical for the material, but not intended for use in specifications or for acceptance inspection criteria because of variations in testing methods, conditions and configurations.*

Storage Recommendations

Inspect the condition of the container to ensure compliance. The material should be stored at temperatures between 5°C to 35°C (41°F to 95°F) to ensure shelf life.

Note: When procuring to a qualified material specification, follow those storage instructions.

IS-237 Epoxy Reducer

Health Precautions

This product is safe to use and apply when recommended precautions are followed. Before using this product, read and understand the Safety Data Sheet (SDS), which provides information on health, physical and environmental hazards, handling precautions and first aid recommendations. An SDS is available on request. Avoid overexposure. Obtain medical care in case of extreme overexposure.

For industrial use only. Keep away from children.
