

GATX Leasing

PSX[®]700's excellent gloss and color retention, brings awareness to the John G. Shedd Aquarium for years to come.

Case study

The Customer

GATX Leasing

The Location

Chicago, IL

The Challenge

GATX Corporation is bringing awareness to the John G. Shedd Aquarium, located in Chicago, IL, through a custom-designed box car. The box car displays several aquatic scenes for the aquarium in order to create awareness for public donations.

The Solution

GATX wanted a long term color and gloss product that will maintain its color and gloss for many years. Due to past success using PSX[®]700, GATX felt that they could trust this project and the supplier to support it, PPG Protective & Marine Coatings. PSX[®]700, a two-component epoxy siloxane, provides excellent corrosion and chemical resistance. Not only is this product low in application cost, but it also requires less application time and easy maintenance.

The Benefits

The car will travel throughout the Midwest to help drive donations. PSX[®]700 will help the car maintain its color and shine and provide a longer service life than the traditional epoxy and polyurethane system. PSX[®]700 allows for limited accumulation of dirt and mildew and has an unlimited topcoat window.

The Result

GATX and the Shedd's Aquarium were very pleased by the richness and depth of the color and gloss.
