Concept® LV Acrylic Urethane

CLV

CONCEPT[®] LV (CLV) Acrylic Urethane is a premium quality, single-stage, two component refinish product designed to spray at 3.5 VOC. It is available only in single-stage solid colors and can be used over all properly prepared OEM finishes and cured air dried finishes.

CONCEPT LV Color is designed for use in standard air dry, high air flow or downdraft booths and force dry booths. CONCEPT LV Color can be used for spot, panel, and overall repair plus offers the option of being clearcoated if desired.

Features	Compatible Surfaces			
Excellent color match	<i>Concept</i> [®] <i>CLV</i> may be applied over:			
Can be Air Dried or Force	• Cured Air Dry Finishes (must be sanded and lacquers must also be sealed)			
Dried	• OEM Basecoat/Clearcoat (must be sanded)			
Premium Gloss	• OEM Enamels (must be sanded)			
	• OEM & Refinish Lacquers (must be sanded & sealed)			
Advantages	• DPX 170/171 Non Chrome Self Etching Primer (must be sealed or primed afterwards)			
Invisible Repairs	• DPX801 Universal Plastics Adhesion Promoter – See P-194 for detail			
Versatile	• DS1002 UV Primer			
Matches Luxury Car Finishes	• NCP270/NCP271 Corrosion Resistant Primer (not in Rule 1151 area)			
	NCP 280 Corrosion Resistant Primer			
Benefits	• NCS1990 Wet on Wet Sealer (not in Rule 1151 area)			
Can Match Virtually Any Solid	• SU4903 Advanced Plastic Bond – See OC-1			
color	SX/SXA1050 Plastic Adhesion Promoter			
• 3.5 Voc	• SX1056 Flexible 2K Sealer			
	• SX1057 Flexible 2K Surfacer			
	• SX1080 2K Rollable Surfacer LV			
	• SU4903 Advanced Plastic Bond – See OC-1			
	• <i>V-SEAL</i> [™] LV DSLV302x Acrylic Urethane Sealer			
	• <i>V-Prime</i> [™] LV DPLV305x Acrylic Urethane Surfacer			
	Required Products

CLV

Surface Preparation		CLV:				
and Cleaning:		CLV colors are designed to be applied over properly cleaned, sanded and primed surfaces. See the Compatible Surfaces section for an appropriate primer.				
		 Wash painted surfaces thorou contaminants. Then clean with 0.4 VOC Cleaner. Sand with 400-600 grit sandp. Re-clean with DX Cleaner or needed. 	h appropriate aper or equiv	DX Cleaner (see P-17	78) or SX1005	
Mixing Ratio:		Standard Ratio				
		CLV Color DCX	61	DT Exempt Reducer	DX84/DX8	
		215-10%1 oz.Add 5%-10% by volume DT Exemptreducer. Select the appropriate exemptreducer for the application temperatures inside the shop.				
		Flexible Ratio				
	+	If the part is on the vehicle, no flex agent is needed. If the part is off the vehicle, mix CONCEPT LV Color using the below ratio:				
			DCX61 Hardener	SLV814 Flexibilizer	+ DX84 or DX87	
		2 1	2		Up to 1oz er RTS qt.	
Tinting:	A B	CLV Color may be tinted with other CLV Colors only.				
Pot Life:	A B	Standard Ratio, 1 – 2 hours a Flexible Ratio, 1 hour at 70°F For best pot life, add hardener	(21°C))		
Additives:		DX84 Accelerator or DX87 CLV color. Choose the additive			-	
		Air Dry Up to 75°F (24°C):	Add 1oz.	DX 84		
	A B	Baking or Air Dry 75°F (24°C) and Above:	Add ½ 02	z DX 87 and ½ oz DX	84	
		DX 73 Fisheye Eliminator , when necessary, can be used in CLV Color up to ¹ / ₂ ounce per RTS quart.				
Spraygun Set-up:		Apply:	2 - 3 coat	s or until hiding is ach	ieved	
		Fluid Tip:	1.3 - 1.5	mm or equivalent		
		Air Pressure:	10 PSI at	the cap for HVLP gun SI at the gun for conve		

Directions For	Use:			
Drying Times:		Between Coats:	3-7 minutes	
		Dust Free	50 – 70 minutes	
		Tack Free	2 – 3 hours	
		Tape Time	6 – 8 hours	
		Air Dry:	6 – 8 hours 70°F (21°C)	
		Purge Time	0 – 10 minutes	
		Force Dry	40 minutes at 140°F (60°) 20 minutes at 160°F (71°)	
		IR (Infrared) Medium Wave Short Wave	10 – 15 min depending on color 8 minutes depending on color	
		CLV Color may also be blended by taking the CLV Color that you have in your gun cup and reduce the mixture with an equal amount of DX840 Blend Ease . Apply this "over" reduced material to the dry edges. If additional blending is necessary, reduce the blend mixture with another equal part of DX830.		
Polishing:		After 24 hours @ 70°F (21°C) solid colors can be sanded with 1200 - 2000 grit sandpaper and compounded. In all cases, use a fine compound and polishing pad (See DRX Formula Finishing Systems Bulletin P-179).		
	\square	Note: If sanding and/or polishing is required, an extra coat of CONCEPT LV Color is recommended.		
Repair and Recoat:		Allow to dry 8 hours @ 70°F/21°C or force dry for 40 minutes at 140°F (60°C) and allow to cool before sanding. Additional coats of primer, color, or clear may then be applied.		
Clearcoating:		The exceptional gloss of CONCEPT LV Color will likely eliminate the need for clearcoating. However, if a clearcoat is desired; DCU 2035 3.5 VOC Clear or DCD 35 3.5 Compliant Clear may be applied after 1 hour dry, but not longer than 36 hours over CONCEPT LV Colors. After 36 hours CLV must be sanded before applying clearcoat.

Important: The contents of this package must be blended with other components before the product can be used. Before opening the packages, be sure you understand the warning messages on the labels of all components, since the mixture will have the hazards of all its parts. Improper spray technique may result in a hazardous condition. Follow spray equipment manufacturer's instructions to prevent personal injury or fire. Follow directions for respirator use. Wear eye and skin protection. Observe all applicable precautions.

See Material Safety Data Sheet and Labels for additional safety information and handling instructions.
