

MULTI-PREP™

P-177

DX103

PPG MULTI-PREP™ DX103 is a multi purpose product developed for use as an anti-static agent, a plastic parts cleaning wipe, or as a cleaning agent for mold release.

In all cases, DX103 is ready to use as supplied.

Do not add reducer or solvent.

Application Data

Anti Static Agent:

Using a spray gun, apply a mist coat of DX103 on the surface to be painted both before and after tacking. This will help reduce static electricity on all treated surfaces, minimizing the attraction of dust & dirt. Coverage is approximately one (1) quart per car.

Cleaner for Plastics and Flexible Parts:

DX103 quickly removes troublesome silicones and mold release agents from the substrate to be painted. Saturate a clean white cloth, wipe in one direction only, and immediately dry with a clean cloth. Use DX103 before and after sanding.

Caution: Do not apply over sensitive substrates such as fresh topcoats and/or primers as softening may occur.

Technical Data:

Intended Use	Plastic Substrate Cleaner
VOC content lbs./Gal.	6.47
Density lbs./Gal.	6.57

DX103

See Material Safety Data Sheet and Labels for additional safety information and handling instructions.

Important: The contents of this package must be blended with other components before the product can be used. Before opening the packages, be sure you understand the warning messages on the labels of all components since the mixture will have the hazards of all its parts. Improper spray technique may result in a hazardous condition. Follow spray equipment manufacturer's instructions to prevent personal injury or fire. Follow directions for respirator use. Wear eye and skin protection. Observe all applicable precautions.

EMERGENCY MEDICAL OR SPILL CONTROL INFORMATION (412) 434-4515; IN CANADA (514) 645-1320

Materials described are designed for application by professional, trained personnel using proper equipment and are not intended for sale to the public. Products mentioned may be hazardous and should only be used according to direction, while observing precautions and warning statements listed on label. Statements and methods described are based upon the best information and practices known to PPG Industries. Procedures for applications mentioned are suggestions only and are not to be construed as representations or warranties as to performance, results, or fitness for any intended use, nor does PPG Industries warrant freedom from patent infringement in the use of any formula or process set forth herein.
