Surface Preparation and Pretreatment

Ensure that the correct surface pre-treatment has been carried out, and that drying and overcoat times are observed. Ensure the surface is clean, dry and intact using high performance solvent cleaner DeSoto[®] CN20 or Desoclean[™] 45 solvent cleaners are recommended.

Instructions for Use

Hand stir or shake the base component to ensure adequate dispersion. Add the activator to the base, thoroughly stir until a smooth uniform mix is obtained. Finally add thinner and stir well before use.

Note: All products and components should be placed in ambient conditions of 15-30°C (59-86°F) for at least 24 hours prior to mixing and application.
